

● Magnetic Water Filters

Magnetic water system is designed and manufactured according to some magnetic circuit. And surface Gauss reaches 3000-13000 Gs. It used for different hard water and effectively eliminate and prevent hard water scale buildup and microphyte. This is accomplished without salt or other chemicals through Magneto Hydro Dynamics (MHD) and since the process is non-chemical, it does not pollute water systems. Magnetic water systems are used for Home, Small Business enterprises or industrial fields etc.

Home Application

Feature of magnetized water:

1. Magnetized water is easy to absorb with its property of small water molecule.
2. The moderate amount of the oxygen and carbon dioxide can be dissolved in the magnetized water.
3. Magnetized water can keep some microelements inside the body such as Zinc, Fe, Co and Mn.
4. Calcium absorption can be much easier in the magnetized water for it contains the appropriate minerals and hardness needed by the body.
5. Nutritional and physiological function of the magnetized water is much better such as the penetration, solubility, surface tension and metabolism.
6. Magnetized water improves gastroenteropathy, metabolism and Immunodeficiency.
7. The calculus can be prevented, dissolved and even excreted out if magnetized water is drunk for a long time.
8. Aphthous ulcer and Bad Breath will eliminate if the magnetized water is used to brush your teeth and gargle.
9. Taking shower with the magnetized water can make your skin smooth, white, your hair root strong and give the dandruff the brush-off.
10. You will find your drink more fascinating, if you add some magnetized water to your tea, coffee, and milk,
11. Fish and flower will grow much better with magnetized water.
12. Magnetized water can make your dish much tempting and appetizing if it is used to wash the vegetable and fruit.
13. Magnetized water can remove the pollution and odors caused by the water deep processing and transportation completely.
14. Magnetized water can help remove the stain, as a result, more water will be saved and your cloth will be much softer and bright.
15. Magnetized water will increase the output of the grain and decrease the water waste by at least 10% if it is used in seed soaking, sprout cultivation and sprinkling irrigation.

Industry Application

Function of magnetized water:

Preventing and descaling incrustation, Anti-corrosion, Disinfection and algae killing, Magnetized water activity, Small molecular group water

Applied Range: Calorifier, Electricity water boiler, Electric kettle, Solar energy, Wall-hanging stove, Coffee machine, Dish-washing machine, Ice machine, Humidifier, steam Iron, Soybean Milk machine, Bath Sauna room, Washing and Soaking vegetable, Washing fruit, etc.

Product Features: Energy Conservation and Environment Protection, Stable Performance, Lower price, Significant effect, Easy installation, Using less space, Without any energy and power, High-grade Explosion-proof Magnetic Screen, Full Automatic Control Servo 30 years Without Maintain, The Most Successful Pollution-free Preventing and descaling incrustation Technology all around the World.

Note: All customized designs are acceptable.
